

## Pen Portrait of Nicola Batho

I joined the Governing Body in November 2015 as a parent governor; I have one daughter who currently attends the school. My background is in Pharmaceutical Quality Assurance where I have experience of implementing standards and driving performance. I became a school governor as I have a strong belief in the potential of education to improve children's life chances, and that a school maximises each child's potential, helping them individually to enrich learning in all subjects at appropriate levels. I am a proactive representative parent and I take this opportunity on the Governing Body to influence and shape the direction and development of the school to provide the best teaching and learning experience for all of its pupils.
